## Declaration of Conformity to EU Directive 2011/65/EU

Tabor is a leading global supplier of Test and measurement equipment. Tabor is aware that the EU directive 2011/65/EU (RoHS) (including 2015/863) is limiting the use of certain hazardous substances in electric and electronic equipment. In particular the following substances are listed:

1. Mercury
2. Hexavalent Chromium
3. Cadmium
4. Polybrominated biphenyls
5. Lead
6. Polybrominated biphenyl ethers (PBDE)

The following statement regarding conformity of our products to the EU Directive 2011/65/EU (RoHS) is based on our actual research and inquiries with our suppliers:

- The shares of above mentioned first 5 substances in our products are not exceeding the limits as defined in the RoHS Directive.
- Tabor is systematically using lead-free soldering metals, unless specific customers or technical requirements are asking for other, lead-containing soldering metals (e.g. Space and Defense products)

Yours sincerely,

Inna Piekner
